

Information on the 2019 Leadership Summit Topic ***Navigating Generational Expectations***

Every generation has critiqued perceived differences with younger generations such as lifestyle choices, work ethic, and passions. However, this has never been more pronounced than in the past few years as the "Millennials" or Generation Y (Gen Y) has become an increasing part of a workforce that will soon consist of five generations.

Why is the spotlight on Gen Y so bright? Each new generation has created change in the workplace but it seems like Gen Y is innovating how to view work. Previous generations have adapted to existing work structures. Gen Y is changing those structures.

We selected this topic for the 2019 Summit not to have a conversation about "Millennials" - or to stereotype anyone or any generation. Our goal is to gather all generations currently in the workforce to focus on the strengths and contributions that each brings to a vibrant, multi-generational workplace by:

- teaching and learning from each other
- understanding what defines a generation and the experiences that have influenced each generation
- identifying techniques to address workplace scenarios impacted by diverse expectations of multiple generations
- influencing positive cultural workplace change that benefits organizations and all generations

The process of planning the Summit and learning the different approaches that organizations are taking to manage a multi-generational workforce has changed the planning team's perspective on our topic. Please join us on Wednesday, July 31st at the Northeast Delta Dental Conference Center in Concord, NH. We believe that this afternoon of learning, sharing, and collaboration will be enlightening – regardless of your generation or role in your organization.

[Register](#) or contact [Anne Warner](mailto:anne@gsgc.com) (anne@gsgc.com) if you have any questions. The registration fee is \$75 with discounts for sponsors and organizations that promote the Summit with members or employees.
