

Leading in a Large and Hectic Business Environment

Kim Cadorette

Setting the Stage: Examples of why you find yourself in the middle of 'chaos'

- Burning platforms – need to do something now as opposed to having time
- Turning failure around – fixing a problem
- Building an organization – either because there's a problem or due to growth

Strategic leadership techniques or examples of how work through those challenges:

- Find True North – Setting vision, stay committed, be the leader that stands in front
- Build trust (and keep it!) – Leader transparency with team and stakeholders, be accountable

Kim will share stories in addressing these scenarios. No matter what the size of your organization you can learn from her leadership experiences!
